

PRAKRITI DHITAL

Vancouver, BC V5M 1Z7 | 778773-9383 | prakriti.dhital.tech@gmail.com | <https://www.linkedin.com/in/prakriti-dhital/> | <https://github.com/DhitalPrakriti> | <https://prakriti-portfolio.vercel.app/>

Final-year Bachelor of Science in Information Technology student with strong understanding of IT systems, networking, and data workflows. Experienced in analyzing system behavior, troubleshooting issues, and ensuring data integrity through structured testing and documentation. Skilled in identifying potential risks, evaluating system processes, and supporting reliable IT operations. Seeking to contribute analytical and problem-solving skills to IT Audit & Assurance..

TECHNICAL SKILLS

Operating Systems: Windows 10/11, Linux (Ubuntu), MS Office, macOS(familiar)

Hardware & Networking: Laptop/Desktop/Printer/Scanner setup & troubleshooting, peripheral configuration

Networking: TCP/IP, LAN/WAN, DNS, DHCP, VPN concept, router/switch configuration basics

IT Tools & Platforms: Jira, ticketing systems, MS Office Suite, MS Teams, SharePoint, Outlook

Scripting & Automation: Python (for automation/troubleshooting), Bash basics, Git/GitHub

Databases & Systems: SQL Server, MySQL, MongoDB

Soft Skills: Problem-solving, attention to detail, collaboration, verbal and written communication

EDUCATION

Bachelor of Science in Information Technology | Fairleigh Dickinson University – Vancouver, BC 2022 – 2026

- Academic Honors & Dean's List (Spring 2025)
- Relevant Coursework: System Administration, Networking, Database Systems, Object-Oriented Programming, Web Development

PROJECTS

Network Packet Analyzer – Python, Scapy, Rich, TCP/IP, React

- Developed a Python-based real-time network monitoring tool to capture and analyze Ethernet, IP, TCP/UDP, and ICMP packets — directly applicable to network diagnostics and IT troubleshooting workflows.
- Implemented anomaly detection, protocol-level statistics, and filtering capabilities with an interactive CLI and web UI for safe educational and diagnostic use.
- Demonstrates deep understanding of network protocols, packet structure, and low-level system programming relevant to IT infrastructure support.

Full-Stack Portfolio Website – React.js, Node.js, MongoDB

- Managed server deployment, database integration, and uptime monitoring — hands-on experience with backend system configuration and performance tracking.

Travel Booking System – ASP.NET MVC, C#, SQL Server, Bootstrap

- Built and tested a full-stack web application with user authentication, database management, and automated email notifications — practiced systematic debugging and application testing throughout.
- Validated data flows and implemented logging to ensure data integrity and system reliability.
- Implemented logging and error tracking for system events, simulating real-world IT monitoring and incident documentation practices

VOLUNTEER EXPERIENCE

Event Coordinator

Fairleigh Dickinson University – Vancouver, BC | Mar 2024 – Present

- Coordinated technical setups for events, including hardware, software, and communication systems.
- Collaborated with teams to ensure smooth execution of events and troubleshoot technical issues.

UN Youth Delegate

United Nations – New York, NY | May 2025

- Participated in global discussions requiring attention to detail, organization, and effective communication.

ADDITIONAL EXPERIENCE

Technical Event Support – Fairleigh Dickinson University

- Coordinated hardware and software setups for university events — configured AV equipment, troubleshoot connectivity issues on-site, and ensured smooth technical operations under time pressure
- Collaborated with event teams to document technical requirements and resolve issues in real time, practicing helpdesk-style support in a live environment
